MAKWANA JAHANVI

Flutter Developer
Ahmedabad, India | 9313280622 | jahanvimakwana404@gmail.com

PROFESSIONAL SUMMARY

Flutter Developer with 1+ years of experience delivering cross-platform mobile applications. Production experience with SmartOn, an AI-powered accessibility app, including native BLE smart-glasses integrations, voice AI, document reading, internationalization, and subscription workflows. Skilled in Flutter, Dart, REST APIs, Firebase, and Android/iOS debugging.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Kotlin, Swift, Platform Channels, BLE, Android & iOS
State & Architecture: Riverpod, Provider, MVVM, Clean Architecture
AI & Accessibility: TTS/STT, OCR (Tesseract), TalkBack/VoiceOver semantics, i18n
APIs & Data: REST APIs, Firebase (Auth, FCM, Analytics), SQLite, SharedPreferences, PostgreSQL
Quality & Tools: flutter_test, Mockito, Git, GitHub, Android Studio, Xcode, Postman, Firebase Console, In-App Purchases

PROFESSIONAL EXPERIENCE

Sunbots Innovation LLP | Flutter Developer | Sep 2025 – Present

SmartOn — AI voice assistant and smart-glasses application for blind and low-vision users; published on Android and iOS.

- Built BLE smart-glasses integrations using Kotlin and Swift through Flutter Platform Channels, including device connectivity, background handling, status notifications, and reconnection flows.
- Developed AI voice-assistant workflows combining speech recognition, text-to-speech, smart-glasses/phone image capture, and conversational responses; debugged complex iOS audio-session issues.
- Implemented social-matching features including multi-step onboarding, draft save/resume, profile management, voice bios, and localization across 40+ languages.
- Developed Document AI reading features using OCR, page navigation, bookmarks, and synchronized highlighted TTS playback; integrated in-app subscription purchase and restore flows.
- Worked on accessibility with screen-reader semantics and large-text support; built unit, widget, and integration tests and strengthened error handling for release stability.

Muster Dekho | Flutter Developer Intern | Jan 2025 – Jun 2025

- Built responsive Flutter screens and reusable UI components for cross-platform applications.
- Integrated REST APIs, Firebase services, and local persistence while collaborating through Git and debugging application issues.

PROJECTS

TeamFlow — Team Collaboration Application | GitHub Repository

Stack: Flutter, Dart, NestJS, PostgreSQL, Prisma, Riverpod, JWT

- Built a full-stack collaboration application with team workspaces, task management, comments, and project tracking.
- Implemented JWT authentication, refresh-token rotation, role-based permissions, and workspace invitations.
- Designed task status and priority workflows to help teams organize work and track project progress.

GrosSync — Collaborative Grocery App | GitHub Repository

Stack: Flutter, Dart, Firebase, Provider, REST APIs

- Developed personal and shared grocery lists with real-time collaboration, item categorization, quantities, and prices.
- Implemented OTP/Google sign-in, push notifications, reminders, and a feature-first architecture.
- Integrated REST APIs and Provider state management to keep grocery lists and shared item updates organized.

EDUCATION

B.Tech in Information Technology | Silver Oak University | 2021 – 2025 | CGPA: 8.93
